

FAMILY DEMONSTRATION GARDEN PROJECT

FIELD ACTIVITIES

Background

In January 2015, BKB officially open up two other demonstration sites. These are located at Naggulu and Naddangira in Kakiri town council. The enrolment is 35 and 18 respectively. There are 4 males at Naggulu and only females at Naddangila.

It is interesting that the demo at Naddangira is more beautiful than that of Naggulu!! I am finding out reasons for this scenario.

In our first two demos (Ssentema and Katiti), members are doing well. Their interests now shift to value addition and going commercial. Already one member has roasted, ground soya with some other ingredients to produce a drinking powder on tea. This is at Ssentema demo!! In my monthly report I will submit field recommendations this.

FIELD ACTIVITIES IN PICTURES

Field clearing and manure application at Naggulu and Naddangila respectively.

Delivering seeds at Ssentema and tools at Naggulu demos respectively

Participants sharing seeds and receiving fortified sweet potatoes (with vitamin A)

Planting at the demos (above)

Farmers thinning amaranths planted in Feb 2015
